

From Crisis to Cyber Readiness

Join our Readiness in Action Pilot

When a cyber incident strikes, leaders must make fast, coordinated, high-stakes decisions

This pilot gives you the opportunity to practice those decisions in a low-risk, guided environment — and leave with clear, actionable next steps.

Designed for school districts, cities, counties, state agencies, public safety, and higher education, this pilot combines a brief cybersecurity assessment with a customized 3-hour tabletop exercise built around your results. Together, these activities help you evaluate roles, communication, coordination, and escalation before a real incident tests your team.

Built to fit into your schedule

See if you qualify to participate!

Participate in a guided, hands-on tabletop exercise (TTX) at no cost

Why Participate

- Identify where readiness depends on people and relationships rather than documented structure.
- Connect NIST-aligned capability and risk insights to real leadership decisions across multiple cyber scenarios.
- Complete the pilot in under 5 hours over 4–6 weeks

Key Takeaways

- Clearer decision authority, escalation paths, and communication responsibilities during cyber disruption.
- Stronger coordination across technology, administration, and communications
- Confidence in how to respond when visibility and timing matter
- Practical insights that do not depend on new tools or additional staffing

Brought to you by Sourcewell Ventures

Sourcewell Ventures fosters and accelerates innovation at Sourcewell. We partner with public and private sector innovators and public agencies to explore emerging needs, create practical solutions, and pilot new solutions that strengthen communities. Our work helps Sourcewell—and the agencies we serve—stay ahead of what's next.
